MEDIA PROFILE: HARRY S. DENT JR.

A Harvard MBA, Fortune 100 consultant, new venture investor, noted speaker and bestselling author, Harry S. Dent, Jr. is the founder and senior editor at Dent Research, where he dedicates himself to identifying and studying demographic, technological, and geopolitical trends. With his track record of accurately predicting Japan's collapse in 1989, the dot-com bubble-bust in 2000 and the housing bust in 2006 to 2007 (among many other things), he has appeared on Good Morning America and PBS, and is a regular guest on CNBC and Fox Business. He's been featured in Barron’s, Investor’s Business Daily, Entrepreneur, Fortune, Success, U.S. News and World Report, Business Week, The Wall Street Journal, American Demographics and Omni. And he’s written numerous books, including The Great Boom Ahead (1992), The Great Depression Ahead (2008) and The Great Crash Ahead (2011) and his newest book, The Demographic Cliff: How to Survive and Prosper During the Great Deflation of 2014-2019 which released on January 7th 2014.

EXPERTS SAY...

“I have watched Harry Dent’s unique demographic approach to the economy and his forecasts for over 20 years. He has seen most of the key economic changes way ahead of most. In fact, he forecast the current economic crisis 20 years ago! He has spoken at many of my events around the world and has helped many prepare for the unprecedented economic challenges we are facing today. But perhaps the best thing about Harry is his very human, understandable and common sense approach to economics.”

- Anthony Robbins, entrepreneur, author and peak performance strategist

“I have worked in the highest level of U.S. politics and see a disaster in the making as the government employs endless stimulus and bailouts that destroy the very free market capitalistic system that has made it the richest major country in the world. Harry Dent adds the reality of aging societies and slowing demographic trends to show why such reckless debt-driven policies are certain to fail.”

- David Stockman, author of The Great Deformation: The Corruption of Capitalism in America

“Dent brings more very convincing analysis on the unbearable debt that is weighing down the US and world economy. But more important, he brings the unique lens of demographics to show how the Fed’s stimulus plan is doomed to fail with the rising savings and slowing spending of the massive Baby Boom generation.”

- John Mauldin, 4 times New York Times best-selling and publisher of Thoughts from the Frontline and Outside the Box

Dent Research: Capitalize on the Predictive Power of Demographics

Dent Research uses the power of demographic trends and consumer spending patterns to accurately identify economic booms and busts well ahead of the mainstream. Harry Dent & Rodney Johnson believe demography is destiny. It is the future that has already been written. You just need to know how to read it.
With a background in bond trading and hedge fund management, Rodney Johnson oversees the research and analysis of Dent Research. His research varies widely, from macro trends concerning nations all the way down to individual purchases by consumers, and runs the gamut from commodities to interest rates.

He began his career in financial services on Wall Street in the 1980s with Thomson McKinnon and then Prudential Securities. He started working on projects with the Harry Dent in the mid 1990s before joining the firm in 1999. Mr. Johnson is a regular guest on a number of radio shows such as America's Wealth Management, Savvy Investor Radio and has been featured on CNBC, Fox News and Fox Business where he discusses economic trends ranging from the price of oil to the direction of the US economy. Mr. Johnson holds degrees from Georgetown University and Southern Methodist University and with Mr. Harry Dent is the co-author of the recently released book, “The Great Crash Ahead,” Free Press 2011.

RODNEY SAYS...

“"If we’re serious about helping students graduate with a lighter debt burden, let’s tackle the real problem – the cost of college – instead of focusing on a side issue, the rate of interest charged on student loans.""

“Looking across the economic landscape there is no doubt we have large, structural problems, starting with employing the youngest among the workforce all the way through providing for those retiring. In between we have issues with healthcare for all, and enough debt to choke… well… an entire country.""

“"The markets of the last four years have been nothing but a pretty artifice built on the notion that the Fed would stay involved forever. Now that the veneer has been pulled away, people are looking at the underlying economy and realizing that things aren’t so rosy.""

“"Most people don’t connect the dots or even know enough about the dots to draw the picture. That is what makes the work of Dent Research unique and useful to business owners of all stripes.""
